Overall Assessment

Your Front End Web Development interview scored 30% — there is significant room to grow. Don't be discouraged: follow the 4-week study plan below, focus on the weak topics, and retake the interview. Consistent practice will make a big difference.

Communication Analysis

Your HR score of 20% needs attention. Study common behavioral interview questions and practise structured responses using the STAR method.

✓ Strengths

- Demonstrated knowledge in: Browser APIs, SQL, CSS
- Relevant skills on resume: Python, Java, Sql, Tensorflow

■ Areas for Improvement

- Technical score (40%) needs improvement — focus on core Front End Web Development concepts
- HR/behavioral score (20%) is low — practise STAR-format answers
- Struggled with: Authentication, React Hooks, JavaScript

Technical Gaps to Study

- Authentication
- React Hooks
- JavaScript
- Git
- Data Structures

Missing Skills in Resume

- + TypeScript: TypeScript is commonly required for Front End Web Development roles
- + REST APIs: REST APIs is commonly required for Front End Web Development roles
- + Git: Git is commonly required for Front End Web Development roles

Resume Improvement Suggestions

- Add quantified metrics to projects (e.g. 'improved load time by 40%')
- Include specific versions of technologies used (e.g. 'React 18', 'Python 3.11')
- Add a dedicated Skills section organized by category
- Write a 2-3 line professional summary at the top matching the job role

Priority Focus Areas

Topic	Priority	Reason
Authentication	High	You got questions wrong in Authentication — critical for Front End Web Development
React Hooks	High	You got questions wrong in React Hooks — critical for Front End Web Development
JavaScript	High	You got questions wrong in JavaScript — critical for Front End Web Development
Browser APIs	Low	You did well in Browser APIs — maintain this knowledge
SQL	Low	You did well in SQL — maintain this knowledge

Recommended Weekly Study Plan

Week 1: Authentication

- ✓ Study core concepts
- ✓ Complete 10 practice problems
- ✓ Review official documentation

Practice: Solve 5 beginner-level problems on LeetCode or similar

Week 2: React Hooks

- ✓ Build a small project
- ✓ Apply learned concepts
- ✓ Document your code

Practice: Build one complete mini-project using the week's topic

Week 3: JavaScript

- ✓ Study common interview patterns
- ✓ Practice timed questions
- ✓ Review weak areas

Practice: Take a timed 30-minute quiz on all weak topics

Week 4: Full mock interviews and resume polish

- ✓ Take 3 full mock interviews
- ✓ Update resume with new skills

- ✓ Review all weak topics

Practice: Complete a full timed mock interview and review every mistake

Interview Tips

- Read each question carefully — don't rush, you have 20 seconds
- Eliminate obviously wrong options first to narrow down choices
- For HR questions, always choose the most professional and team-oriented response
- Review Authentication, React Hooks before your next attempt
- Practice under time pressure — set a 20-second timer when studying
