Overall Assessment

Great performance on your Data Analysis interview with 80% overall! Your technical knowledge is solid. Focus on the weak areas identified to reach the next level.

Communication Analysis

Your HR score of 100% shows strong communication and behavioral awareness. You understand professional workplace dynamics well.

✓ Strengths

- Good technical foundation for Data Analysis — scored 60% in technical round
- Strong behavioral and communication skills — scored 100% in HR round
- Demonstrated knowledge in: Machine Learning, Data Visualization, SQL
- Relevant skills on resume: React, Power Bi, Javascript, Nlp

■ Areas for Improvement

- Struggled with: Feature Engineering, Pandas, Machine Learning

Technical Gaps to Study

- Feature Engineering
- Pandas
- Machine Learning
- SQL

Missing Skills in Resume

- + Data Visualization: Data Visualization is commonly required for Data Analysis roles
- + Statistics: Statistics is commonly required for Data Analysis roles

Resume Improvement Suggestions

- Add quantified metrics to projects (e.g. 'improved load time by 40%')
- Include specific versions of technologies used (e.g. 'React 18', 'Python 3.11')
- Add a dedicated Skills section organized by category
- Write a 2-3 line professional summary at the top matching the job role

Priority Focus Areas

Topic	Priority	Reason
Feature Engineering	High	You got questions wrong in Feature Engineering — critical for Data Analysis
Pandas	High	You got questions wrong in Pandas — critical for Data Analysis
Machine Learning	High	You got questions wrong in Machine Learning — critical for Data Analysis
Machine Learning	Low	You did well in Machine Learning — maintain this knowledge
Data Visualization	Low	You did well in Data Visualization — maintain this knowledge

Recommended Weekly Study Plan

Week 1: Feature Engineering

- ✓ Study core concepts
- ✓ Complete 10 practice problems
- ✓ Review official documentation

Practice: Solve 5 beginner-level problems on LeetCode or similar

Week 2: Pandas

- ✓ Build a small project
- ✓ Apply learned concepts
- ✓ Document your code

Practice: Build one complete mini-project using the week's topic

Week 3: Machine Learning

- ✓ Study common interview patterns
- ✓ Practice timed questions
- ✓ Review weak areas

Practice: Take a timed 30-minute quiz on all weak topics

Week 4: Full mock interviews and resume polish

- ✓ Take 3 full mock interviews
- ✓ Update resume with new skills
- ✓ Review all weak topics

Practice: Complete a full timed mock interview and review every mistake

Interview Tips

- Read each question carefully — don't rush, you have 20 seconds
- Eliminate obviously wrong options first to narrow down choices
- For HR questions, always choose the most professional and team-oriented response
- Review Feature Engineering, Pandas before your next attempt
- Practice under time pressure — set a 20-second timer when studying

Interview Readiness Score: 80%
