@Roni-Seikh

in Roni Seikh

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, ML, and data visualization. Completed internships and projects on real-world datasets (Netflix, Airbnb, environmental) with expertise in EDA and predictive modeling.

SKILLS

- ❖ **Programming & Data Analysis:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, MySQL
- ❖ **Web & Visualization Tools:** HTML, CSS, JavaScript, React JS, Power BI, Streamlit
- ❖ **Data Skills:** Data Cleaning, Feature Engineering, EDA, Predictive Modeling, Multioutput Regression, NLP, Machine Learning
- ❖ **Other Tools:** Git, Jupyter Notebook, Excel, Google Colab

EDUCATION

- ❖ B.Tech.(C.S.E.) | Brainware University CGPA: 9.08 | (2nd Year)
- ❖ XII (WBCHSE) | Rabindranath Institution 2023

EXPERIENCE

- ❖ **Data Analysis with LLMs Intern | Vodafone Idea Foundation** (Sep – Oct 2025)
 - Explored large datasets and applied natural language processing (NLP) for conversational AI tasks.
 - Conducted analysis to identify trends, patterns, and correlations within textual data
- ❖ **Data Science Intern | Axcentra** (Nov 2025)
 - Performed data cleaning, exploratory analysis, and visualization on structured datasets.
 - Applied statistical and machine learning techniques to extract actionable insights.
 - Built predictive models and dashboards to present data-driven findings.
- ❖ **AI & Data Analysis Intern | Shell India & Edunet Foundation** (Jun – Jul 2025)
 - Worked on AI and Green Skills-based analytics projects.
 - Developed end-to-end data pipelines, performed feature engineering, and deployed ML models using Python and Streamlit.

ACADEMIC PROJECTS

❖ **Netflix Dataset Analysis | [Link](#)**

- Analyzed 7,789 records of Netflix content to uncover trends in content type, genre, country, and audience ratings.
- Performed data cleaning, feature engineering, and exploratory data analysis using Python (Pandas, Matplotlib).
- Presented insights on content growth trends, genre popularity, and geographical contributions.

❖ **AirBNB NYC Data Analysis | [Link](#)**

- Explored NYC Airbnb listings for trends in pricing, host behavior, and neighborhood distribution.
- Conducted data preprocessing, EDA, visualization, and correlation studies using Python (Seaborn, Plotly).
- Identified actionable insights for platform optimization and predictive modeling.

❖ **Water pollutants Prediction | [Link](#)**

- Built multi-output regression models (Random Forest Regressor) to predict O₂, NO₃, NO₂, SO₄, PO₄, Cl levels.
- Implemented feature engineering, model evaluation (MSE, R²), and deployed via Streamlit with geolocation visualization.

ACHIEVEMENTS

❖ **Global AI Hackathon Finalist | App Inventor Foundation | [Link](#)** *(April 2025)*

- Developed a multi-disease prediction web app using Python, ML & Streamlit.

❖ **Diploma in Web Development | STP Computer Education** *(Dec 2023 – Dec 2024)*

- Awarded **A Grade** for completing a 12-month professional Web Development course from **STP Computer Education**.

❖ **ISRO-IIRS Certification** *(Feb 2025)*

- Successfully completed a course about *Geodata Processing using Python & ML*.

HOBBIES

- Watching news and staying updated with current affairs
- Browsing the internet to learn new technologies
- Listening to aesthetic and instrumental music
- Participated in tech events and learning sessions
